HONEYWELL UNVEILS UVEEX HYPERSHOCK™ SAFETY EYEWEAR

SMITHFIELD, R.I., U.S.A. — May 5, 2014 — Honeywell (NYSE: HON) unveiled today Uvex Hypershock™ safety eyewear, which combines premium sport-inspired style and best-in-class lens performance for maximum appeal and protection. Available in Matte Black, Smoke Brown or Clear Ice, the eyewear's wraparound frame delivers superior coverage, while 10 lens tints offer versatility for both indoor and outdoor applications. High-performance Uvextreme Plus® lens coating delivers 10 times longer anti-fog protection and two times better scratch resistance than other anti-fog coated lenses.* The eyewear is ideally suited for rugged work environments ranging from manufacturing, construction and landscaping to utilities and oil and gas.

“Workers are more likely to wear protective eyewear when it looks good and is comfortable, so we designed Uvex Hypershock with progressive sport styling to support worker acceptance and promote all-day wear,” said David Iannelli, senior eyewear product manager for Honeywell Safety Products. “With so many frame and lens tint options plus our most advanced lens coating technology, Uvex Hypershock delivers the good looks workers want and the high performance protection safety managers demand. The only challenge will be keeping workers from wearing them when they aren't on the jobsite.”

The eyewear's lightweight, wrap-around frame design is engineered to fit a wide range of workers while providing increased coverage, side protection and superior peripheral vision.

Streamlined padded temples and a molded nosepiece deliver a secure, comfortable fit. Integrated hinge mechanisms with dual cam action promote precision operation and durability.

Uvex Hypershock lenses feature proprietary Uvextreme Plus anti-fog coating for superior protection against fog and scratches. Lenses are also available with scratch-resistant hardcoat for even longer lasting protection from scuffing, scratching and a variety of chemicals. The ten available lens tints – Clear Ice, Gray, Amber, SCT-Reflect 50, SCT Blue, Red Mirror, Blue Mirror, Espresso Polarized, Espresso and Gold Mirror – meet the needs of nearly any lighting application. Uvex Hypershock lenses provide 99.99% UV protection.

Uvex Hypershock meets the ANSI Z87.1-2010 standard and is 100% dielectric for safe wear in environments where electrical hazards exist.

Uvex Hypershock safety eyewear is available now through major safety equipment distributors in the Americas. Contact the Honeywell Safety Products customer care department at 800-430-5490 for more information about Uvex Hypershock eyewear and where it may be purchased. Uvex brand safety eyewear is offered for sale by Honeywell Safety Products exclusively in the Americas. More information about the complete family of Uvex safety eyewear is available at www.uvex.us.

* Comparative lens life test performed using a Bayer Abrasion Test method and may vary between environment and application. Anti-fog performance based on independent lab test results.
